Daily Task Comments (Chronological)

Entry 1

1. Attended the induction session covering the company overview and internal regulations by Isuri.2. Received the internship agreement and confidentiality letter from Isuri.3. Attended for stand-up session and introduced me to the Team.4. Gained basic understanding of the CineSync BackOffice with guidance from Kalana.5. Attended a knowledge transfer session conducted by Janaka and Imantha, which provided a detailed introduction to the BackOffice system, including cinema location creation and channel management.6. Was introduced to Zoho sprints by Janaka for managing day-today tasks and activities.

Entry 2

1. Practiced the previous day’s training conducted by Janaka, focusing on Cinema Location creation, adding channels, and understanding related settings under the Configuration and System Permission sections in the BackOffice. 2. Attended the second-day KT session on POS basics conducted by Dinusha, with hands-on practice on basic concession handling processes. 3. Self-practiced additional scenarios within the system and identified areas that require further guidance, including Taxes and Other Fees, Integrations, and device-related configurations such as KitchenSync, CineSign, Payment Terminals, Server Utility Apps, and customization options under the Device Configuration section. 4. Gained a basic understanding of the company’s day-to-day operational flow and how QA activities are involved in and support these processes. 5. Observed an API testing session conducted by Tishan to gain a general understanding of how API testing is approached and executed. 6. Observed how client issues are initially reviewed and resolved by Janaka, focusing on issue lookup and the problem-solving approach used in real scenarios.

Entry 3

1. Practised concessions handling based on understanding from the previous KT session.Focused on Concessions Items and Concessions Configuration in BO.2. Attended a KT session by Gayan covering:POS printing and re-printingKitchen Display System (KDS) flow of operations3. Got introduced to UTILITY Sync:Learned how it is used to establish authentication and connection between BO and POS4. Covered the Web Printing process and its functionality.5. Attended an evening KT session by Tishan covering:Vouchers and PassesTaxationOther fees6. Performed self-practice on all the above topics as part of initial hands-on learning.7. Took a basic understanding of the Support Role:Observed how Layout Index works while providing customer support8. Understood some real issues and attempted to identify causes based on current knowledge.

Entry 4

1. Practiced previous day KT session topics related to Vouchers and Passes and the Kitchen Display System (KDS).2. Identified that the Issued section shows items issued across all cinema locations. (Might be an Issue)3. Attended a KT session by Imantha covering:CMSWeb layoutsMobile layouts4. Observed a real-time practical testing scenario in the Merchandise module demonstrated by Tishan, gaining insight into the testing flow.5. Clarified several questions and issues related to the above modules during the sessions.6. Learned about the KIOSK device and understood its KIOSK operational flow, including how transactions and interactions are handled.

2026/01/23

2026/01/23 1. Practiced the topics covered in the previous KT sessions2. Looked up reports and observed the available data and structure3. Attended a feedback session conducted by Isuri and Kalana4. Performed simple tasks in the CMS5. Performed on movie scheduling tasks

Entry 6

Attended a KT session conducted by Janaka in the morning and received a basic overview of Reports.Was assigned to QA testing of the KIOSK system after the KT session.Identified several issues during KIOSK testing, mainly related to payment flow and UI/UX, as follows:During ticket and concession payment, customers may get confused at the “Review Your Order” section due to poor arrangement of item calculations.When a discount is already applied, the system still allows the user to enter a value pass amount, which should not be allowed.The system behaves correctly when a value pass is selected first and then a discount is attempted, as it shows an error message.The total amount displays correctly when:Only a discount is appliedOnly a value pass is appliedThe system allows selecting both discount and value pass together, but only the value pass is used for calculation, while the UI incorrectly shows both as applied.After removing the discount, the total does not correctly reflect the value pass, and an unexpected deduction appears. At this stage, the discount and value pass labels are hidden, and only the final total is displayed, which may confuse users.

Entry 7

1. Was assigned to perform a KIOSK smoke test and still working on it.2. Identified and observed some known issues during the smoke testing process.3. Was assigned as an assignee for train AI feature , assigned by Janaka.4. Learned basic ticket handling, including how to add and manage tickets in Zoho Print.5. Discussed system improvements and identified bugs with Sadeepa.

Entry 8

1. Completed KIOSK smoke testing under mentor guidance.2. Was assigned to train the AI Movie Recommendation feature.3. Scheduled a bulk set of movies with screens for future use on Feature-11 environment, which is dedicated for AI training.4. Practiced include-tax calculation scenario in buy tickets.5. Attended a BrowserStack webinar on their Website Scanner product to understand its usage and capabilities.6. Added two bugs to the Developers' sprint board under the Backlog.7. Identified a few additional bugs to be discussed with developers.

Entry 9

Completed TasksVerified price calculations with tax included for:Buy TicketsConcessions(Add-ons pending)Verified price calculations with tax excluded for:Buy TicketsConcessions(Add-ons pending)Validated tax percentage application and rounding logic.Confirmed that the final totals match expected calculations.Partially CompletedPrice calculation verification for:Add-onsBooking fees(Pending further work)Not CompletedCross-checked values between UI and Reports.Requires additional practice and validation on reports.ObservationsIdentified several bugs during testing and plan to discuss them with the mentor before raising bug tickets.

Entry 10

1. Since the main task related to the AI Movie Recommendation feature was on hold, spent time practicing and exploring CINEsync channels.2. Identified multiple bugs in the POS system during this practice.3. Raised tickets for the identified issues on the Sprint board.4. Discussed the raised tickets with the assigned developers.5. Was introduced to the Super Admin panel by Janaka and took a quick review, mainly observing its features and functionality.

Entry 11

Was involved in the AI Movie Recommendation task, focusing on listing movies for the feature.Successfully listed nearly 500 movies out of the planned 600 movies so far.Attended a KT session on the TVET Government Project, which aims to build a system for technical college management.Gained an overview of the four key sectors covered in the project:WaterEnergyElectricityAir Safety

Entry 12

1. Worked on the AI Movie Recommendation task.2. Completely listed 600 movies for the feature.3. Scheduled a bulk of showtimes as the initial step for AI training.4. Learned and understood the AI training requirements from Kasun.

Entry 13

Worked on the AI Movie Recommendation task.Overall completed more than 510 bookings as part of testing and training.Booking breakdown:As guest users:32 different

guest users122 tickets booked for the same movie (“Iron Lung”)As a logged-in user:25 bookings with 128 tickets in the Horror genre15 additional bookings (105 Tickets) by the same user in the Comedy genreAs a new logged-in user:25 bookings with 155 tickets in the Animation genreScheduling Activities:Scheduled more than 100 movies for a cinema location.Observations & Findings:Identified a potential issue in movie recommendations for guest users.After 122 ticket purchases, the Recommended Movies section did not change accordingly.Logged-in user recommendation tests passed, with genre-based recommendations working as expected.Could not fully conclude edge cases for guest users.Concerns / Ambiguities:Guest users and logged-in users are seeing the same recommended movie list, making it unclear whether this is due to popularity-based logic or a guest-user–specific issue.

Entry 14

Reviewed the current movie schedule list to:Identify genres with low or no scheduled moviesNote gaps impacting testing and recommendationsPrepared bulk movie data by:Grouping movies by genreEnsuring enough movies per genre for meaningful testingVerifying basic details before schedulingScheduled movies in bulk by:Adding multiple movies per genreUsing future-friendly dates to support ongoing testingConfirming schedules were saved correctlyValidated scheduled data by:Checking movie visibility under each genreEnsuring schedules are usable for future testsPlanned logged-in user testing (priority) to:Test edge cases only on logged-in usersVerify recommendations based on genre weightingCheck behavior with limited or mixed watch historyGuest user testing was skipped:Due to known issues identified previouslyTo avoid re-testing until fixes are appliedPlan put on hold:Logged user activities were paused due to an issue in the systemNew task assigned by Janaka:Create a sheet covering the past 6 months of support tasks (30 Datasets entered)Include Support tasks raised by clients and handled by the companyEnd-of-Day NotesNoted pending activities and observations to be continued once the issue is resolved.

Entry 15

1. Was assigned to perform comprehensive testing on the Crossdale application.2. Executed test cases on both Web and Mobile applications, covering the planned test scenarios.3. Identified multiple bugs on both the Web and Mobile platforms during execution.4. Discussed the identified mobile app bugs with Dushan, and several of them were fixed during the discussion.5. Successfully added 100 support tasks to the assigned support task sheet.

Entry 16

1. Discussed the previously identified AI Movie Recommendation issue with Kasun.2. Resolved the guest user recommendation issue after the discussion.3. Performed multiple booking tests to validate that the fix is working as expected.4. Learned how to

create UAT test cases during a session with Janaka.5. Entered and updated data in the support task sheet that was previously assigned.6. Attended a KT session from Kasun about Rossdale to gain an overview and understanding of the system.

Entry 17

1. Conducted a small KT session for Pasindu on:Back Office CMSWidgets / LayoutsValue Passes2. Provided team support for the KIOSK pre-live smoke testing process.

Entry 18

Today Update : Worked on reporting the bugs identified yesterday.Created and logged bug tickets in Zoho, attaching proper evidence for each issue.Compiled and listed all customer support tasks into a structured spreadsheet.Worked on retrieving and organizing data for decision-making purposes. (Listed data :https://docs.google.com/spreadsheets/d/1xmnsEY1w6WQT0x4tSAVLRFdPAIgrX5eWHwe9jAPXrjI/edit?gid=137724…)

Entry 19

1. Tested the Modifying Screen module.2. Identified several bugs during the testing process.(https://docs.google.com/spreadsheets/d/13X3gKmyDVhiMqrfyI9jH0hHm-0Pcv8aonOtpAF5QSGU/edit?gid=1135413087#gid=1135413087)

Entry 20

1. Worked according to the test scenarios created by Janaka.2. Executed the test cases as planned.3. Identified several bugs during the execution process.Bug identified scenarios as follows (High-Level)When verifying that a regular movie can be scheduled successfully by selecting valid location, screen, date, time, and required configurations.When verifying that the system prevents scheduling a movie on a past date/time and displays an appropriate validation message.When verifying that the system displays proper validation messages when mandatory fields such as movie, screen, date, and time are left empty.When verifying that enabling advance booking allows ticket sales before the show date according to the configured settings.When verifying that the movie can be scheduled in different language versions and displays the correct language information.When verifying that the system restricts deletion of a show with existing bookings or provides proper confirmation and handling.When verifying that scheduled shows appear correctly in the mobile application.When verifying that disable a screen with scheduled shows is restricted or handled properly by the system.When verifying that long-duration movies are validated correctly against theatre operating hours.When verifying that scheduling works correctly based on the configured timezone settings.https://docs.google.com/spreadsheets/d/13X3gKmyDVhiMqrfyI9jH0hHm-0Pcv8aonOtpAF5QSGU/edit?pli=1&gid=0#gid=0

Entry 21

1. Working on Store Item Module testing.2. Performing testing activities in the Stage e nvironment.https://docs.google.com/spreadsheets/d/13X3gKmyDVhiMqrfyI9jH0hHm-0P cv8aonOtpAF5QSGU/edit?usp=sharing

Entry 22

Worked on Store / Merchandise module testing.Identified several bugs during testing.Attended the monthly feedback session.https://docs.google.com/spreadsheets/ d/1Pp7j8CdJZ-FZ-8JZBUBA8IRIcjvOJf2-xlEHoF8S2nU/edit?gid=0#gid=0

Entry 23

Completed Store Item Module test execution.Identified 19 bugs during testing.Raised bug tickets and assigned them to the respective developers.Created comprehensive test cases for the Buy & Get Deals module, covering:All sales channelsBack Office(Buy and Get Deals module teest cases : https://docs.google.com/spreadsheets/d/1i6N8OFE o_eQ4z8Y0Tu2eNb9EGR6DWvYfgMscO2Agi8k/edit?usp=sharing)

Entry 24

Executed test cases created yesterday for the Buy & Get Deals module.Identified 9 bugs and reported them under the supervision of Janaka.Worked on support task listing, updating the list with new accessible data.Developed a small system/tool to update day-to-day tasks for easier tracking.

Entry 25

Performed testing on Merchandise and Buy & Get modules and identified additional issues, which were reported.Focused on Buy & Get deal calculation issues raised by Dasun, discussed them with Rajitha Aiya, and raised a bug ticket.Learned about Cypress automation, including installation and setup on the PC.Tested pre-written Cypress scripts from the team to gain practical knowledge and understanding.

Entry 26

Performed testing on the Annual Subscription module.Added/Configured concessions in the Paramount Beta environment in preparation for tomorrow’s training program.

Entry 27

1. Performed smoke testing on Prytania Stage environment.No high-impact bugs were found.Identified a minor issue: when booking as a guest user, the guest detail form loads twice after clicking Proceed.After clicking Proceed again, the system correctly navigates to checkout.2. Tested the Bed Seat module message popup functionality.Identified that the configured message is visible only in POS, not in other

sales channels.3. Moved to the Booking Fee modification task and created test cases for execution tomorrow.4. Attempted to create a tutorial video for a client, explaining:How to configure a gift cardHow to purchase a gift cardHow to apply gift codes

Entry 28

1. Worked on testing the Booking Fee modification changes. 2. Re-tested the Bed Seat warning message pop-up to verify its behavior.

Entry 29

1. Continued test execution for the Booking Fee modification task.2. Identified several new bugs during testing.3. Re-tested previously reported bugs after developer fixes.4. Re-opened several bugs due to incomplete or incorrect fixes.5. Continued updating the support task listing.6. Assisted in resolving several customer support issues.7. Listed concession on Key Twin production environment.

Entry 30

1. Performed testing on the Merchandise module in the Feature 4 environment.2. Identified several blocking bugs, which prevented further testing of the module.3. Paused the Merchandise testing until the identified issues are fixed.4. Moved on to Combined Seat Plan module testing.5. Designed test cases covering all sales channels.6. Executed multiple test cases from the designed list and identified 7 issues so far.7. Planned to continue executing the remaining test cases tomorrow.

Entry 31

Continued testing the Store Item module and identified additional blocking bugs.Performed testing on Combined Seat Plan issues and reported the identified bugs.Re-tested Bed Seat module warning message fixes to verify the corrections.

Entry 32

My Update Saturday (14) Testing on Stella StageStore Items – flowMovie Scheduling + Combined Seat Booking Private Theatre Showtime Scheduling + Private Hire Private Theatre Reservation SwappingConcession Combo Purchase (Cross-checked on Stella due to previous support task issues across products)Additionally Cross-Checked Modules:Gift Card PurchasingDiscounts (including Agent Discounts)Refunds (Normal + Credit Note)Online / POS Payments (Credit Card, Gateway flow, and reservation confirmation)Seat Selection – Web & POS (including bed seats, couches, and combined seat plans)Stock / Inventory Management (Stock refill, Out of Stock behavior, stock control toggle)UI / Layout Checks (Mandatory field asterisks, footer overlaps combo creation pages). Total 11 bugs(5 minor bugs)

Entry 33

1. Performed testing on Voucher Passes, Loyalty Program, and Membership Program modules.2. Gained a understanding of the Membership and Loyalty modules during testing.3. Identified 7 bugs during the testing process.4. Reported the bugs identified on the previous day by creating the necessary bug tickets.5. Noted that further understanding is required for Loyalty, Membership, and Corporate Coupon functionalities.

Entry 34

Tested the Subscriptions module and identified several issues. Some issues were discussed and fixed with developers, and 2 bug tickets were created.(https://sprints.zoho.com/workspace/cinesyncpvtltd#P2/itemdetails/I3110/details,https://sprints.zoho.com/workspace/cinesyncpvtltd#P2/itemdetails/I3111/details)Tested language change functionality to verify the system behavior after switching languages.Tested location change during the booking journey to check the system response when the location is changed mid-process.Membership testing was not completed due to a blocking issue related to creating a CMS page for the membership. This was informed to Surath aiya.Identified several blocking issues during testing. These issues were fixed with Surath and Nilupul, and the scenarios were retested afterward.Identified a major product issue: when an item is added to the cart and the location is changed, the system navigates back to the previous page. This occurs repeatedly. For example, after adding an item to the cart and proceeding to the payment page, changing the location causes the system to go back one page. Changing the location again moves the system back another step. This continues until the home page is reached. When the process is repeated, the system again navigates back to the initial payment window.Nilupul confirmed that this is a product-level issue.Another issue after complete a payment and turn to payment successful page then change the location causes to "Lost Your Way" Error page.

Entry 35

Completed all remaining tests and reported bugs in sheet related to Drive in theatre advanced rule modification.

Entry 36

Update of Daily Task Log – 21 March 2026Performed functional testing on the Drive-In Theatre Advanced Rule Modification feature in Feature 2 environment.Tested advanced rule configuration via BO including rule creation, conflict validation, and editing of existing seat plans.Identified and documented 16 bugs across BO, POS, WEB, and App sales channels covering high, medium, and minor severity levels.Identified and documented 3 improvement suggestions related to UX and rule configuration flow.Prepared and delivered a structured bug report in Excel format covering all

findings with steps to reproduce, actual results, and expected results. after supervision of Janaka, I will create the bug tickets

Entry 37

Daily Task Log –23, 24 March 2026Completed mobile responsiveness testing and identified 20 bugs related to UI and UX. Assisted developers in reproducing the reported bugs.

Entry 38

1. Focused on handling client support concerns, as there has been an increase in issues related to recent modifications and features.2. Started maintaining a daily issue tracking to better manage and follow up on past issues.3. Attempted to re-test previously fixed bugs to verify their status.4. Created bug tickets for issues related to:Drive-in Theatre Advanced RulesParamount Live Web UI5. BUGs Tickets are created for Mobile Responsiveness issues in WEB (Feature 4)

Entry 39

Updated all items in the sheet with ZOHO ticket ID+Link.(https://docs.google.com/spreadsheets/d/1dguKNj2ziMFjYXnrMfkhqcyHVFykEtJ-99DFLAR51Ro/edit?usp=sharing)Out of 32 items marked as “Ready for QA” in the main ticket,31 items were completely re-tested and updated.Added screenshots to the sheet as evidence for the completed updates.One ticket from the Restaurant module could not be re-tested;Attempted to recreate the issue.Identified additional issues while re-testing existing scenarios and noted them in the sheet.Gained exposure to new modules not previously tested:RestaurantPromotion Combo

Entry 40

Completed testing of the concession module in the staging environmentIdentified a total of 27 bugs during testingDiscussed the findings with and arranged bug ticketsAssisted in reproducing bugs for the development teamFollowed up on client-reported issues and provided updates

Entry 41

1. Tested Buy & Get Deal discounts for Drive-in Theatre bookings.2. Identified several issues during the testing process.3. Attended a KT session on the “Alittle” custom project, which is planned for testing.4. Focused on handling client support issues.

Entry 42

Today started E2E testing on alittle project Follows are the completed tasksTest case design (BO,WEB,APP)Test execution almost done for WEB and APP.Remaining for tomorrowE2E testing on BOFinalize the Bug reporthttps://docs.google.com/spreadsheet

s/d/111yDLh0AZHraCkD_YMEbtpEbQfRnIzuoPR4st9WPoHI/edit?usp=sharing

Entry 43

Update 1. Continued testing on the Alittle project and completed approximately 80% of the test coverage. 2. Worked alongside developers while several bugs were being fixed during the testing process. 3. Documented and reported all findings in the tracking sheet. 4. Remaining testing areas to be completed: * Settlement section (Back Office) * Settings section (Back Office) * End-to-End (E2E) journeys on Web and Mobile App (after bug fixes) 5. Provided support in re-testing fixes shared in the support group.

Entry 44

Completed testing on the “Alittle” project.Reported all identified bugs during testing.Added concessions to the CINEbox Stage environment in preparation for the demo.

Entry 45

Worked on updating client support concerns.Reviewed existing bugs in the system.Re-tested previously fixed bugs in the Alittle project to verify resolutions.

Entry 46

Tested the Concessions module, and Movie scheduling and ticketing covering CRUD operations.Verified sales channel reflections, including:TicketingMovie SchedulingTested Private Hire functionality.Identified and tested issues across the above areas and ensured all bugs were reported in the tracking sheet.Planned to continue testing tomorrow for:Store ItemsTaxesMultiple Payment Methods

Entry 47

Tested Store Items, Taxes, and Payment Methods modules.Executed main journeys and end-to-end flows for the above modules.Noted that the Store module is not listing under POS device configurations, so testing was continued on Web channel.Identified and reported several bugs in the tracking sheet.

Entry 48

Re-tested bug fixes in the “Alittle” project.Reported 20 bug tickets in Zoho, raised from the previous weekend CINEbox Stage testing.Updated and maintained the support concerns list in the support group with the latest information.

Entry 49

Tested selected scenarios from the release note draft.Could not complete all scenarios due to missing ticket IDs and unclear descriptions.Updated the support concern document with new issues reported by clients.Attended a KT session with Dinuranga on

Drive-in Theatre Advanced Rules.Updated previously created test cases based on the new understanding, preparing them for re-testing tomorrow.

Entry 50

Performed testing on Drive-in Theatre Advanced Rule in the CINEsync Stage environment.Completed end-to-end (E2E) testing across:Back Office (BO)POSWeb (WEB)Identified and noted multiple bugs during testing. (Web has 1 critical issue : Rule mismatch)Attempted to resolve several client support issues.

Entry 51

Followed up on Drive-in Theatre Advanced Rule bugs to track progress and get updates.Verified fixes on the Web, where one issue was resolved but another issue surfaced.Created a new bug ticket for the newly identified issue.Parallelly reviewed client support concerns.Checked the status of previously reported bugs and ensured they are being resolved.Re-tested selected scenarios to validate recent fixes.

Entry 52

Performed re-testing on Drive-in Theatre Advanced Rule after previous bug fixes.Identified and verified newly introduced bugs that appeared after earlier fixes.Reviewed and tested scenarios related to Payment Method Fee in the Android app.

Entry 53

Tested Feature 6 – Drive-in Theatre Advanced Rule.Performed Buy & Get deal testing related to Drive-in Theatre scenarios.Identified bugs and reported them to developers; several have already been fixed.Confirmed that no critical issues remain after fixes.Tested POS hardware, including:ScannerPrinter

Entry 54

Tested fixed bugs in the “Alittle” project to verify the corrections.Identified several new issues during testing.Checked the CINEsync Stage payment issue.Worked with Pasindu on fixing multiple bugs.

Entry 55

Performed several regression testing after recent bug fixes(alittle project)Tested the Prytania stage subscription moduleAttempted to recreate previously reported issuesIdentified multiple issues and reported themConducted several discussions related to the subscription module
